79

## PROJECTS

**Advancement of fog based encrypted control system in cloud computing**

This is my academic project.

Duration: 12months

Technologies used: Java, J2EE(JSP, SERVLET),MYSQL

**Movie App**

Developed a movie app only user interface part using Html, CSS, Bootstrap, JavaScript, Third party API.

Fetches latest movie details in my web page Using API where we can get latest movie details like poster of that movie and title, description and rating.

For rating I have used few functionality like if rating above 9 for that one color if less than 9 for that one color. Used few animations to display description.

**GitHub profiles**

This project is based on GitHub API to fetch GitHub user details to my web page. User details like their profile data and display it in card and users repositories

## ADDITIONAL INFORMATION

Completed Java Full Stack Development Course at Jspider, Bangalore
